Josh –

Once we receive approval from the RA on Monday, and the data is posted to the website, could you please email the following people with notification of the data being posted? Sarah Marshall will notify Karen/Yvette when to post it.

I have included the email addresses to all the interested parties, but please bcc everyone as some are individual residents. If you do not think you should send it, Sarah Marshall will. I'm not sure if I will have internet access.

Groups covered: Sierra Club, NRDC, the City of Chicago, IEPA, Illinois AG, OECA, DOJ, SETF, Northwestern Law Clinic, The Coalition to Ban Petcoke, and ATSDR

*This email is to inform you that EPA has found manganese levels that exceed the health-based screening level at the S.H. Bell facility in Chicago. Four months of PM10 metals air monitoring data from the S.H. Bell facility for March 1, 2017, through June 30, 2017, show an average concentration of 0.32 ug/m3 of manganese. The Minimal Risk Level for chronic inhalation*

*exposure to manganese is 0.3 ug/m3. EPA has reached out to the Illinois Environmental Protection Agency, the Agency for Toxic Substances and Disease Registry, the City of Chicago and community groups to notify them of the levels and coordinate a response. EPA is committed to protecting public health by ensuring S.H. Bell complies with the Clean Air Act. The data can be found here: <https://www.epa.gov/il/sh-bell-chicago-air-monitoring-data>.*

Thanks.
